End user requirements

Let me choose the
best tools

Never compromise
my experience

Always protect
my privacy

350+ technology integrations

Additional upgrades available

MobileIron
ACCESS

Secure, conditional access control for cloud services such as Microsoft Office 365, Salesforce, G Suite, Box, and others.

MobileIron
**THREAT
DEFENSE**

Protect company data by detecting and remediating known and zero-day threats on the mobile device, and no need for users to take any action.

MobileIron
BRIDGE

Leverage existing Group Policy Objects (GPO) scripts to enable granular security and management of Windows 10 PCs.

MobileIron

Modern work

The challenge

UEM is the security foundation

Why MobileIron Cloud?

Data used to be here

Now it is everywhere

A dark, narrow alleyway between brick buildings at night. The scene is dimly lit by a few streetlights, creating a moody and somewhat mysterious atmosphere. The brick walls are prominent on both sides, and the ground is dark and reflective. The perspective leads the eye down the alley towards a brighter area in the distance.

It's Friday night.
Do you know where
your data is?

MobileIron

Modern work

The challenge

UEM is the security foundation

Why MobileIron?

UEM?

Unified endpoint management (UEM) is an approach to securing and controlling desktop computers, laptops, smartphones and tablets in a connected, cohesive manner from a single console.

UEM secures mobile and modern desktops

and is foundational for modern security

Maximize productivity on the go without sacrificing security

Secure and manage modern devices

Email security

Automatic configuration

Certificate-based security

Selective wipe

Single app/kiosk mode

Secure and manage apps

Secure apps

Enterprise app storefront

User authentication enforcement

Isolate/retire corporate apps

Secure and manage content

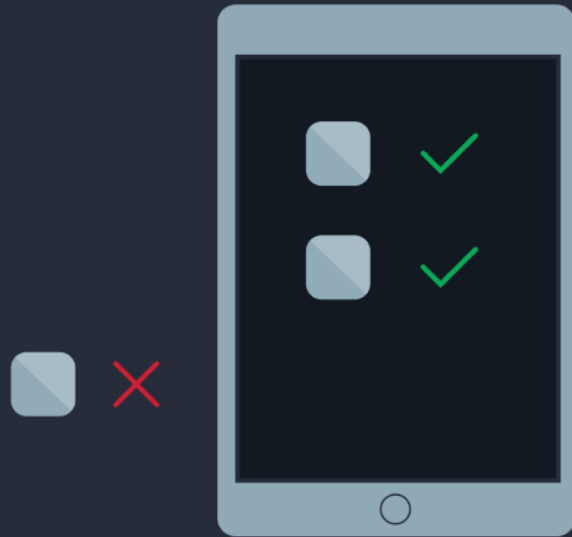

Email attachments encrypted and viewable only in authorized apps

Secure web browsers

Access, annotate and share docs

Secure and manage kiosk mode and single use devices

Restrict what apps are available
for use on a device

Prevent malicious apps from
being installed on a device

Prevent data overages by limiting
the apps on the device

Android in the enterprise

BYOD (Managed Profile)- only manage the business apps = can wipe enterprise persona

Company Owned (Managed Device) company owns the device and has more controls = can wipe whole device

Kiosk (cosu) enabled on all company owned devices

Zero Touch deployments configurations, apps, and lockdowns deployed wirelessly and silently

Thousands of customers and millions of people use
MobileIron every day as their secure foundation for

MODERN WORK

MobileIron

Thank you
